OBJECTIVE: Provide a means to disseminate information on a variety of important environmental topics.

75-01SW51435

PROJECT DESCRIPTION:
Background:
Work to be Performed: This project consists of providing assistance for State Representatives to attend an oil and gas environmental conference sponsored by the Society of Petroleum Engineers. The workshop will provide a means to disseminate information on a variety of important environmental topics and will provide a critical interface between industry and regulators on emerging environmental technologies. IOGCC will ensure that an appropriate cross-section of regulators from the various states are afforded the opportunity to attend and will provide support, as needed, to assist the selected regulators in arranging and paying for travel and lodging at the conference.

PROJECT STATUS:
Current Work: Project completed.
Scheduled Milestones:

Accomplishments: Regulators from 12 different states were able to attend the environmental conference and all participants spoke highly of the value they received from the conference in being able to do their jobs more effectively.
