Colorado Springs Clean Cities Coalition

Recent Accomplishments & Future Goals

Alicia Archibald

South Central / Northwest Region
Clean Cities Coordinator Peer Exchange
Santa Fe, NM
April 8-10, 2008

Coalition Status and Sustainability

- Current Status
 - One part-time new yet experienced Coordinator
- Membership Structure / Strategies
 - Historically this has been on a come one come all basis to enhance participation, but is now being restructured to a fee basis to enhance viability and perception of value among members
- Steps to Become Self-Sustaining
 - Writing grants, partnering with existing companies, etc

and Renewable Energy

Clean
Cities

Significant/Noteworthy Vehicle Projects

- **The City of Colorado Springs continues to be our greatest success story. Being the second largest biodiesel fleet in the state and adding a new E85 pump this summer**
- **The Pikes Peak cog railway began using B20 in their railroad engines.**

Significant/Noteworthy Fueling Infrastructure Projects

- This year we've added two new biodiesel fueling sites and seven! new E-85 fueling stations, three of them in Pueblo and four in Colorado Springs.

Significant/Noteworthy Coalition Outreach Activities

We conducted a biodiesel fuel quality conference in Pueblo, Colorado. During the conference we heard how the Aquila Power Company had used biodiesel in their back up generators. The first experience we'd heard of this usage, which might be possible to export to other communities as well.

Clean
Cities

Significant/Noteworthy Expanded Portfolio Activities

- Gave a fascinating presentation on why buying a hybrid can be less expensive than keeping your existing vehicle

Lessons Learned

- **Time for new blood in the coordinator position!**

Goals for 2008 & Beyond

- Extensive outreach to the community and expanding to Southern part Colorado.
- Broadening scope to include clean air
- Taking advantage of the new focus on the environment through grants, educational programming
- Partnering with nonprofits and for profits
