

January 7, 2010

Subject: Department of Energy (DOE), National Energy Technology Laboratory (NETL)  
Funding Opportunity Announcement (FOA): DE-FOA0000115  
Titled, "*Recovery Act: Advanced Energy Efficient Building Technologies*"  
Closing Date: August 18, 2009

## FOA Status Notification

The purpose of this public notification is due to the overwhelming number of requests being made for status updates on this Funding Opportunity. Per *Section V: Application Review Information, Part C: Anticipated Notice of Selection and Award Dates*, of the subject FOA, DOE/NETL intended to notify Applicants selected for award and make awards during the first and second quarters of Fiscal Year 2010 (no later than March 2010).

Unfortunately, based on the number of applications received, the review process is behind schedule and DOE/NETL anticipates notifying Applicants selected for award and making awards for the subject FOA during the third and fourth quarters of Fiscal Year 2010 (between April and September 2010).

DOE/NETL will notify each Applicant in writing (via a letter sent electronically and/or hard copy) whether they are being selected or not. Please do not contact the Contract Specialist or me to request a status update because DOE/NETL will publically post any additional status updates regarding this FOA in the future on FedConnect (question section for this FOA) and on NETL's website at <http://www.netl.doe.gov/business/solicitations/index.html>.

DOE/NETL can only review the information contained in your application at the time of submission. If your application is selected for negotiations leading to an Award, you will have an opportunity to update information/submission files.

Please contact the Contract Specialist, Juliana Heynes, via the contact information below only if you would like to withdraw your application from consideration. Thank you for your interest in working with the Government.

Sincerely,

Martin J. Byrnes  
Contracting Officer  
Acquisition and Assistance Division
