Section II: Process Description

Associated Documentation

This unit process is composed of this document and the data sheet (DS) *DS\_RMA\_NaturalGas\_LNG\_Marginal\_2011.02.xls*, which provides additional details regarding relevant calculations, data quality, and references.

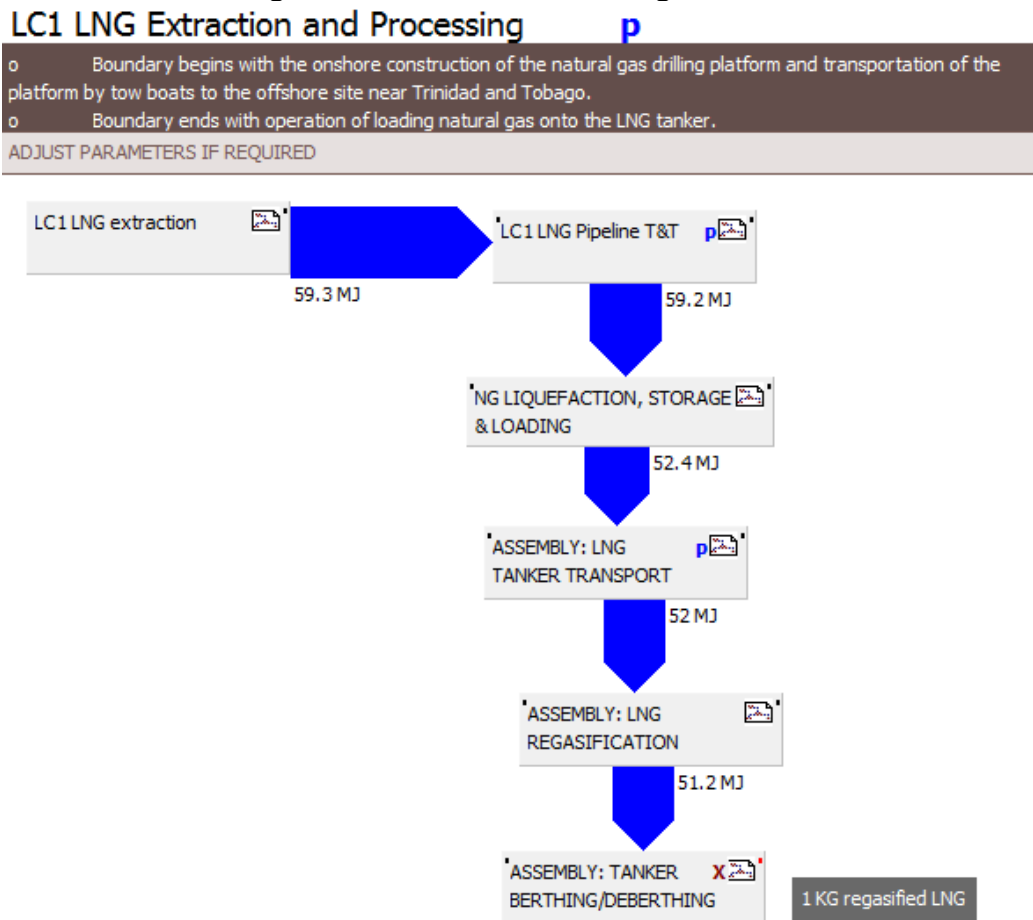

Goal and Scope

The scope of this unit process covers all aspects of raw material acquisition (RMA) and as seen in **Figure 1**. At the RMA downstream boundary, one kilogram of natural gas is delivered to the life cycle (LC) Stage #2 boundary for raw material transportation (RMT).

Boundary and Description

LC Stage #1, RMA of this unit process includes the extraction of natural gas by the importation of liquefied natural gas (LNG), represented by the marginal production of the next unit of LNG. The natural gas is processed in preparation for RMT in LC Stage #2.

Figure 1: Plan for RMA of Marginal LNG

Construction of the wells and pipelines are included. The upstream profiles for concrete and steel are rolled up into this process.

An example plan is provided in **Figure 1**. Overall plans for extraction and processes were created.

The construction processes for both machinery and facilities were created. The machinery includes:

- Natural Gas Well Construction and Installation  
(DS/DF\_Stage1\_C\_Natural\_Gas\_Well\_Generic\_2011.01.doc)

Each piece of equipment or facility is scaled to the production of one kilogram of natural gas. The profiles and processes included in RMA are provided in **Table 1**. Those shown in bold face were developed by NETL.
