PMC-ND (1.08.09.13)	OFF	ICE OF ENERGY EFFI	TMENT OF ENERGY CIENCY AND RENEWABLE EN ETERMINATION	ERGY	
RECIPIENT:	Virginia Electric and Power Company d/b/a Dominion Energy Virginia		nia	STATE: VA	
PROJECT TITLE	LE: Project SYNC - Share Your eNroute Charge				
	Funding Opp	DE-FOA-0002881	Procurement Instrument Number DE-EE00112442	NEPA Control Number	CID Number
Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Policy 451.1), I have made the following determination:					
CX, EA, EIS APPI Description:	ENDIX AND NUMB	ER:			
A9 Information gathering, analysis, and dissemination		Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental immontrion (See also B3.1 of appendix B to this subpart.)			
A11 Technical advice and assistance to organizations		Technical advice and planning assistance to international, national, state, and local organizations.			
B3.6 Small-scale research and development, laboratory operations, and pilot projects		Siting, construction, modification, operation, and decommissioning of facilities for smallscale research and development projects; conventional laboratory operations (such as preparation of chemical standards and sample analysis); and small-scale pilot projects (general) less than 2 years) frequently conducted to verify a concept before demonstration actions, provided that construction or modification would be within or configuous to a previously disturbed or developed area (where active utilities and currently used roads are readily accessible). Not included in this category are demonstration actions, meaning actions that are undertaken at a scale to show whether a technology would be viable on a larger scale and suitable for commercial deployment.			
B5.1 Actic or water	ons to conserve energy	substances. These actions may involve financial and technical as Covered actions include, but are not limited to waterhizition (sue efficient lighting, low-flow plumbing fixtures (such as faucets, toile efficiency raining; efficiency improvements for vehicles and transpis signal control systems, car navigation, speed cameras, and auton decademic. Institutional or industry layersch. Covered technol do establish energy conservation standards for consumer products a manufacturing plants with considerable associated quroud distur-	engy or weter conservation, and promote energy efficiency that would not have the potent sistance to individuals (such as builders, owners, consultants, manufacturers, and designe ch as insulation and replacing windows and doors); programmed lowering of thermostate s, and showerheads), heating, were utiliation, and air conditioning systems, and applicances, it contation (such as fleet changeout); power storage (such as flywheets and batteries, gener andic plate, number recognition), development of encry-efficient manufacturing, industrial, de building renovations or new structures, provided that they occur in a previously disturb to include rulentiang, standard-settings, or proposed DOE legislation, except for those a and industrial equipment, provided that the actions would not; (1) have the potential to caus ance); (2) involve significant unresolved conflicts concerning attemative uses of available risks to human health and the environment (such as RCRA hazardous wastes); or (4) have	rs), organizations (such as utilities), and governments (such titings; placement of timers on hold water heaters; installation installation of drip-irrigation systems; improvements in genera- gial yeas than 10 meagwatt equivalent); transportation manage or building practices; and small-scale energy efficiency and o school stude to the state of the state of the state of the school stude to the state of the state of the state of the esources (such as rare or limited raw materials); (a) have the theory of the state of t	as state, local, and tribal). or replacement of energy tor efficiency and appliance ement systems (such as traffi onservation research and cial, residential, agricultural, include rulemakings that is construction of new s potential to result in a

B5.23 Electric vehicle charging stations, coperation, and removal of electric vehicle charging stations, using commercially available technology, within a previously disturbed or developed area. Covered actions are limited to areas where access and parking are in accordance with applicable requirements (such as local land use and zoning requirements) in the proposed project area and would incorporate appropriate control technologies and best management practices.

Rationale for determination:

## NEPA PROVISION

DOE has made a conditional NEPA determination.

The NEPA Determination applies to the following Topic Areas, Budget Periods, and/or tasks:

The NEPA Determination does not apply to the following Topic Area, Budget Periods, and/or tasks:

A completed EQ is required for the TBD location sites/charging stations. A separate NEPA review is required for the TBD location sites. This CX covers all activities except the TBD location sites.

Notes:

A completed EQ is required for the TBD location sites/charging stations. A separate NEPA review is required for the TBD location sites. This CX covers all activities except the TBD location sites.

## FOR CATEGORICAL EXCLUSION DETERMINATIONS

The proposed action (or the part of the proposal defined in the Rationale above) fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D. To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) reactive, orders in the construction or major expansion of wast storage, disposal, recovery, or treatment facilities; (a) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be continied or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposed action that may affect the significance of the environmental effects of the proposal.

The proposed action has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

A portion of the proposed action is categorically excluded from further NEPA review. The NEPA Provision identifies Topic Areas, Budget Periods, tasks, and/or subtasks that are subject to additional NEPA review.

## SIGNATURE OF THIS MEMORANDUM CONSTITUTES A RECORD OF THIS DECISION.
