PMC-ND		U.S. DEP	ARTMENT OF EN	NERGY	A	A DE LA DE L	
(1.08.09.13)	OFFIC	E OF ENERGY EF NEP	FICIENCY AND 1 A DETERMINATI		NERGY		
RECIPIENT:	Board of Regents of	of the University of Oklahoma			STAT	E: OK	
PROJECT TITLE :	Improvi	ng Accessibility and Efficiency of Public T	ransportation via Optimal Integration wi	th Shared Autonomous Electric Vehi	cles in Tribal Communities		
		ity Announcement Number OA-0002893		t Instrument Number -EE0011189	NEPA Control Numb	er	CID Number
Based on my review	of the information conce	rning the proposed action, as NEPA Comp	liance Officer (authorized under DOE Po	olicy 451.1), I have made the following	determination:		
CX, EA, EIS APPEN Description:	NDIX AND NUMBER:						
A9 Information gathering, analysis, and dissemination		Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental monitoring. (See also B3.1 of appendix B to this subpart.)					
A11 Technical advice and assistance to organizations		Technical advice and planning assistance to international, national, state, and local organizations.					
B3.6 Small-scale research and development, laboratory operations, and pilot projects		Siting, construction, modification, operation, and decommissioning of facilities for smallscale research and development projects; conventional laboratory operations (such as preparation of chemical standards and sample analysis); and small-scale pilot projects (generally less than 2 years) frequently conducted to verify a concept before demonstration actions, provided that construction or modification would be within or contiguous to a previously disturbed or developed area (where active utilities and currently used roads are readily accessible). Not included in this category are demonstration actions, meaning actions that are undertaken at a scale to show whether a technology would be viable on a larger scale and suitable for commercial deployment.					
B5.1 Actions to conserve energy or water		(a) Actions to conserve energy or water, demonstrate potential energy or water conservation, and promote energy efficiency that would not have the potential to cause significant changes in the indoor or outdoor concentrations of potentially harmful substances. These actions may involve financial and technical assistance to individuals (such as builders, owners, consultants, manufacturers, and designers), organizations (such as utilities), and governments (such as state, local, and tribal). Covered actions include, but are not limited to weatherization (such as insultation and replacing windows and doors), programmed lowering of thermostat settings; placement of imers on hot water heaters; installation or prejacement of energy efficient lighting, low-flow plumbing fixtures (such as faucets, toilets, and showetheads), heating, ventilation, and air conditioning systems, and appliances; installation or drip-irrigation systems; improvements in generator efficiency and appliance efficiency ratings; efficiency improvements (such as traffic signal control systems, car navigation, speed cameras, and automatic plate number recognition); development of energy-efficient industrial, or building practices; and small-scale energy efficiency and conservation research and development and small-scale energy efficient, actions include building renovations or new structures, provided that they occur in a previously disturbed or developed area. Covered actions could involve commercial, residential, acidemic, (b) Covered actions include rulemakings that establish energy conservation standards for consumer products and industrial equipment, provided that the actions would not; (1) have the potential to cause a significant transko concerning alternative uses of available resources (such as rare or limited raw materials); (3) have the potential to result in a significant increase in the disposal of materials posing significant tisks to human health and the environment (such as RCRA hazardous wastes); or (4) have the potential to cau					
B5.23 Electric vehicle charging stations		The installation, modification, operation, and removal of electric vehicle charging stations, using commercially available technology, within a previously disturbed or developed area. Covered actions are limited to areas where access and parking are in accordance with applicable requirements (such as local land use and zoning requirements) in the proposed project area and would incorporate appropriate control technologies and best management practices.					

Rationale for determination:

NEPA PROVISION

DOE has made a final NEPA determination.

FOR CATEGORICAL EXCLUSION DETERMINATIONS

The proposed action (or the part of the proposal defined in the Rationale above) fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D. To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that previsit in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause signated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposed action that may affect the significance of the environmental effects of the proposal.

The proposed action has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

The proposed action is categorically excluded from further NEPA review.

SIGNATURE OF THIS MEMORANDUM CONSTITUTES A RECORD OF THIS DECISION.
