		NEPA	DETERMINATION		le la
RECIPIENT:	Armstron	g International, Inc.		STATE:	МІ
PROJECT TITLE :		HTHP Manufacturing in Michigan-USA			
	Funding	Opportunity Announcement Number DE-FOA-0002987	Procurement Instrument Number MS0000064	NEPA Control Number	CID Number
Based on my review of t	the informa	tion concerning the proposed action, as NEPA Complian	ce Officer (authorized under DOE Policy 451.1), I have made the following det	termination:	
CX, EA, EIS APPENDI Description:	X AND NU	MBER:			
A9 Information analysis, and dissemination		Information gathering (including, but not limited to, literature surveys, studies, and analytical energy supply and demand studies), and infor environmental monitoring. (See also B3.1 of appendix B to this subpa	inventories, site visits, and audits), data analysis (including, but not limited to, computer mode mation dissemination (including, but not limited to, document publication and distribution, and irt.)	sling), document preparation (including, but not limited classroom training and informational programs), but not	to, conceptual design, feasibility ot including site characterization or
B1.15 Support b		currently used roads are readily accessible). Covered support buildin health services or recreation activities; routine maintenance activities	s and support structures (including, but not limited to, trailers and prefabricated and modular b gs and structures include, but are not limited to, those for office purposes, parking, cafetrai as storage of supplies and equipment for administrative services and routine maintenance activ ment or components; and similar support purposes, but exclude facilities for nuclear weapons	services; education and training; visitor reception; comp vities; security (such as security posts); fire protection; s	outer and data processing services; small-scale fabrication (such as
B1.3 Routine m		sperations may be suspended and resumed, provided that the activit (such as cleaning, window washing, isum nowing, trash collection, pu- nifrastructures, and equipment in a condition suitable for a facility to t- amiltenance may result in replacement to the extern that replacement replacement does not result in a significant change in the expected u of a facility (for example, it does not include the replacement of a represses; (b) Door and window repair or replacement; (c) Wall, ceiling art filters; (a) Inspection and/or treatment of currently installed utility facilitate resurtacing, and scraping and grading of unpaved surfaces; Order 435.1, "Radioactive Waste Management," or Is successor, (in insulators, and downed powerlines, in accordance, where appropriat facility components, subsystems, or portable equipment (such as con-	tructures, lights-d-way, infrastructures (including, but not limited to pathways, roads, and railing exvaids be conducted in a manner in accordance with applicable requirements. Custodal as ainting, and snow removaly. Routine maintenance activities, corrective (that is, repar), prevent used for its designated purpose. Such maintenance may occur as a result of severe weather to is what and is not a substantial upgrade or improvement. In-kind replacement includes insert as substantial upgrade or improvement. In-kind replacement includes insert for or repair or replacement, (d) Revoltine, Patonian entitientance does not include rep cor vessel near the end of its useful life). Revoltine maintenance activities include, but are not life. (Revolting, Stepair of read embanithments, (i) Repair or replacement of fine protection sprinkler sy (d) Enror not main and se of transition in facilities, cuch as repetiating, agions, grading, and (d) Enror not main and se of transition in facilities, cuch as repetiating, with AD CFR part 761 (Polychiotinated Elphenyis Manufacturing, Processing, Distribution into viaves, in-core comolitoring devices, transformers, capacitors, montoring wells, lysimeters, lies as wiping with rags, using strippable latex, and minor vacuuming), and removal of contaments and an enter stripping and the second stripping and the second stripping and to values in-core containting devices, transformers, capacitors, montoring wells, lysimeters, lies as wiping with rags, using strippable latex, and minor vacuuming), and removal of contaments of the second stripping and the second stripping and and the second strippin	ervices are activities to preserve facility appearance, we two, and predictive, are required to maintain and prese er (such as hurricanes, floods, and tomados), wildfires, tallation of new components to replace outmoded com placement of a major component that significantly exter systems; (I) Road and parking area resurfacing, including revegetation); (I) Survellance and maintenance of sur same nominal voltage, poles, circuit breakers, transfor Commerce, and Use Prohibitions) or its successor; (I) Road successors, and fumes); (c) Routine teglace to the successor commerce, and Use Prohibitions) or its successor; (I) Road contains, and fumes); (c) Routine decontamin	orking conditions, and samitation reve buildings, structures, and other such events. Routine ponents, provided that the dist the originally intended useful life dist, such as lathes, mills, pumps, and ement of high-efficiency particulate g construction of temporary access to plus facilities in accordance with DOE mers, capacitors, crossarms, Routine testing and calibration of mation of the surfaces of equipment,

Rationale for determination:

B1.31 Installation or relocation of machin and equipment

NEPA PROVISION

DOE has made a final NEPA determination.

FOR CATEGORICAL EXCLUSION DETERMINATIONS

The proposed action (or the part of the proposal defined in the Rationale above) fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D. To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the protessit mereix in the environment substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that precisis in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds in paragraph B(5) of 10 CFR Part 1021, Subpart D,

Installation or relocation and operation of machinery and equipment (including, but not limited to, laboratory equipment, electronic hardware, manufacturing machinery, maintenance equipment, and health and safety equipment), provided that uses of the installed or relocated items are consistent with the general missions of the receiving structure. Covered actions include modifications to an existing building, within or contiguous to a previously disturbed or developed area, that are necessary for equipment its allocation and relocations would not appreciably increase the footprint or the existing building or have the potential to cause significant changes to the type and magnitude of environmental impacts.

There are no extraordinary circumstances related to the proposed action that may affect the significance of the environmental effects of the proposal.

The proposed action has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

The proposed action is categorically excluded from further NEPA review.

SIGNATURE OF THIS MEMORANDUM CONSTITUTES A RECORD OF THIS DECISION.
